

We are pleased to announce three new product lines to the Eclipse Technologies line card. **Signatone** offers a full line engineering probe stations form small research systems to full 300mm DC and RF systems. **Checkpoint** offers an exciting EM, laser stimulus debug system and thermal mapping system for die level work. **CoolClean** offers a composite cleaning capability for many critical applications large and small.

**Linear positioners from Signatone.**

**SP-100**

Quality linear positioner at a great price point: \$2000/\$2280. Demo units available if you would like to try either positioner for yourself.

**SP-150**

Extended length cross roller bearing for additional rigidity and control and a lower price than the imports: \$3325/\$3780

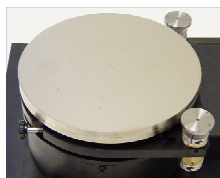

**Checkpoint's** Infracan 300TDE system is a laser stimulation/photon emission tool . Supporting wafer and package parts verification and debug with easy correlation of all optical techniques from a single unit.

Where a docked ATE system is preferred, the Infracan 300inv provides the same capabilities in conjunction with any high speed tester.

Applications:

- Failure Analysis
- Process Validation
- Design Debug

**Signatone** offers a full line of US made engineering probe station and accessories.

Open and closed systems to 300mm. RF systems include auxiliary chucks for cal substrates.

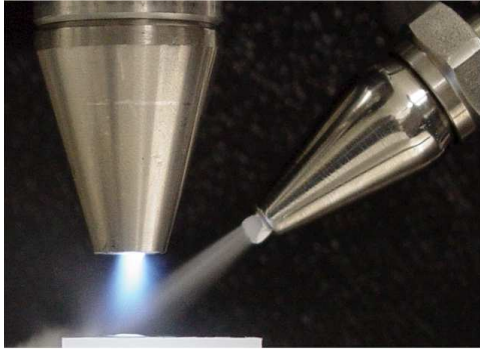

Linear and Computer controlled positioners for sub-

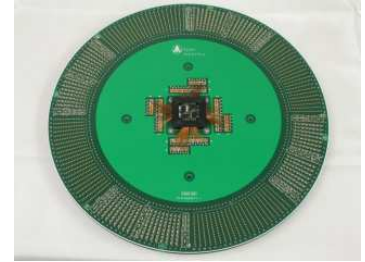

micron work

## Production related Products

CoolClean's composite cleaning offers a number of cleaning options for critical applications. CO2 based partial cleaning can be combined with plasma or solvents for residue free cleaning with little or no EPA footprint.

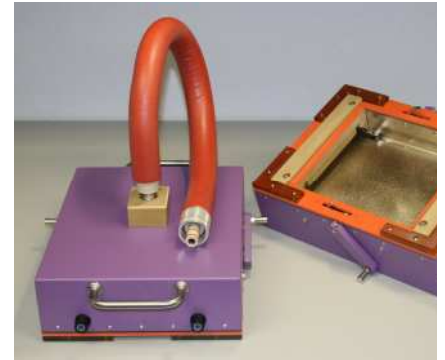

Apex has just increased their production capability for cantilever probe cards. If you are having yield problems related to probe, please let us help.

ISTS produces test interfaces and thermal test chambers.

I have a Teradyne style probe ring and pogo tower on hand this month, if you would like to see what ISTS can do. Please give me a call ASAP as I will only have it for a few more weeks.

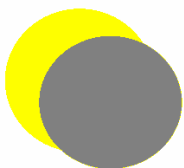

Check the web site for a Line card and full list of companies represented.
